

PRIZIM Selected as a 2011 EcoLeadership Winner

FOR IMMEDIATE RELEASE:

Gaithersburg, MD (May 2, 2011) – For the third consecutive year, the Alliance for Workplace Excellence (AWE) has selected PRIZIM Inc. as a winner of the 2011 EcoLeadership Award. PRIZIM has been selected as an EcoLeader every year since the Alliance introduced the award category in 2009. This honor attests to PRIZIM's dedication to providing a sustainable environment, not only for their clients, but also for their employees.

Annually, the Alliance recognizes organizations throughout the mid-Atlantic region with awards in the following categories: Excellent Places to Work, Health & Wellness Trailblazers, and EcoLeadership. The EcoLeadership Award acknowledges companies that practice and promote environmental responsibility. Award recipients have proven themselves as innovators in creating sustainable workplaces. To be considered for the EcoLeadership Award, businesses participate in an extensive evaluation process directed by a highly-qualified Independent Review Panel. Recipients must prove their dedication to minimizing waste, conserving water and energy, preventing pollution, and participating in environmentally-sound business operations.

With a commitment to sustainability as the driving force behind PRIZIM Inc., the company is proud to be a three-time recipient of the EcoLeadership Award. PRIZIM's environmental consciousness continues to inform their business: "With regard to sustainable practices, we at PRIZIM do not follow where the path leads; instead we go where there is no path and leave a trail for others. Receiving an AWE EcoLeadership Award confirms we are still moving in the right direction," said CEO Frank Priznar of receiving the award.
