PRIZIM INC. RETURNS TO SUPPORT AFE

PRIZIM Inc. (PRIZIM) Associate Gabrielle McDonald will participate in the 2012 Alaska Forum on the Environment (AFE), from February 7 through February 10. Now in its 14th year, AFE brings together environmental professionals from government agencies, companies, and non-profit organizations, with conservationists, biologists, community leaders, and students to offer educational opportunities and foster an ongoing dialogue on environmental issues and challenges as they relate to the state of Alaska. At AFE, PRIZIM typically presents training or provides other educational activities and materials on timely and valuable topics.

PRIZIM has completed more than 50 environmental sustainability assignments in Alaska over the past several years, and the firm has developed some of the nation's most significant sustainability plans for national forests. In this capacity, PRIZIM assisted clients by mapping carbon budgets; creating and implementing environmental management systems; auditing dozens of operations for compliance, energy conservation, and best management practices; and directing the restoration of contaminated lands in environmentally sensitive areas and tribal lands.

Ms. McDonald said of the upcoming Forum, "I'm excited to continue our tradition of supporting AFE. Given PRIZIM's rich history of success and partnership in Alaska, the 2012 Forum will demonstrate our continued commitment in strengthening the region's environmental and sustainability initiatives."
